

Want to learn more about
Climate Change?

Join us for our Renewable
Fayetteville Workshop Series!

Renewable Fayetteville is hosting a series of workshops throughout the Village to help educate residents on climate change and inform them of what they can do to help mitigate their impact. If you want to see a topic discussed, let us know and we will add it to our list of workshop topics!

Our first workshop will be held at the Fayetteville Free Library on October 26th from 6-7:30pm. Dr.

Hilary McManus will be presenting “Creating a Sustainable Future”, a presentation on how climate change is impacting the world and Central New York, followed by a brainstorming session to identify actions we can take on the individual, community, and government levels.
